Summary

Computer Science undergraduate (**CGPA 9.34**) specializing in **Full-Stack Backend Development** and **Cloud DevOps**. Proficient in architecting secure **RESTful APIs** with Spring Boot, implementing **JWT-based authentication**, and automating **CI/CD pipelines** using Jenkins and GitHub Actions. Certified AWS Cloud Practitioner focused on building scalable, high-availability enterprise cloud systems.

Technical Skills

Languages: Java (J2EE), SQL (MySQL, PostgreSQL), JavaScript (ES6+), C, Python
Backend & DevOps: Spring Boot, Spring Security, REST APIs, Docker, Jenkins, Git, CI/CD, GitHub Actions
Cloud Platforms: AWS (EC2, S3, Lambda, RDS, VPC, Elastic Beanstalk), Microsoft Azure (AZ-900), Linux/Bash
Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS
Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks

Education

KL University , Andhra Pradesh	<i>B.Tech in Computer Science and Engineering</i>	2023 – 2027
CGPA: 9.34/10.0 (Top 5% of Department)		

Experience

AWS Cloud Club — KL University	<i>Lead / Technical Mentor</i>	Jul 2025 – Present
• Orchestrated hands-on workshops on AWS Cloud essentials, increasing student technical engagement by 40%. • Mentored 10+ juniors on IAM security policies, VPC networking, and cost-efficient EC2 resource management. • Architected demo deployment environments to teach serverless computing and cloud security best practices.		

Projects

Budget Planner — Spring Boot, React, AWS, DevOps	<i>(Source Code)</i>	2025
• Engineered a robust financial dashboard handling 500+ simulated monthly transactions with real-time alerts. • Developed secure RESTful endpoints using Spring Security and JWT for stateless authentication. • Automated a CI/CD lifecycle using GitHub Actions and Jenkins, reducing manual deployment time by 60%. • Provisioned AWS infrastructure utilizing EC2 for application hosting and RDS for managed relational data.		
MediVault (Healthcare System) — Spring Boot, React, AWS S3		2025
• Architected a secure healthcare portal for managing patient records with 99.9% data durability via AWS S3. • Implemented RBAC to ensure data privacy and HIPAA-aligned security. • Integrated AWS S3 for scalable medical document storage, using pre-signed URLs for secure access.		
Secure Digital Locker — React.js, Spring Boot, AWS S3	<i>(Source Code)</i>	2025
• Developed a centralized document platform with full CRUD and encrypted file handling. • Optimized React state management and hooks, improving application UI responsiveness and load times by 25%. • Leveraged GitHub Actions for automated testing and deployment to AWS S3 and CloudFront distributions.		

Certifications

AWS Certified Cloud Practitioner (CLF-C02)	Azure Fundamentals (AZ-900)	Linguaskill B2 (English)
---	------------------------------------	---------------------------------

Hands-on Cloud Expertise

- **Serverless Architecture:** Built and deployed event-driven functions using **AWS Lambda** and **API Gateway**.
- **Networking:** Configured VPC setups with public/private subnets, Internet Gateways, and Security Groups.
- **Deployment:** Managed full-stack apps using **AWS Elastic Beanstalk** and **Docker**.

Leadership & Technical Activities

- **Competitive Programming:** Actively solving complex algorithmic problems (DSA) on LeetCode/HackerRank.
- **Technical Troubleshooting:** Mentoring peers in debugging backend logic and cloud deployment configurations.
